EDUCATION

University of Florida

B.S. in Computer Science, Minor in Engineering Innovation, GPA: 3.6 / 4.0

Gainesville, FL

Aug. 2022 – May 2026

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, TypeScript, HTML/CSS, SQL

Frameworks & Tools: Git, Linux, React, AWS, MongoDB, Selenium, Spring Boot, Flask, Postman, Expo, TailwindCSS

DoW Security Clearance: Secret (2025 – Present)

EXPERIENCE

Lockheed Martin

Orlando, FL

Software Engineering Intern

May 2025 – August 2025

- Enhanced a USMC training tool by designing and implementing 5 new **React.js** and **HTML/CSS** interfaces in a **Linux** environment, improving interface clarity and overall user experience during air and ground training exercises
- Validated application functionality by implementing a **Robot Framework** test suite integrated into **CI/CD pipelines**, increasing test coverage by **25%**
- Supported R&D for a new C2 feature by traveling to Marine Corps training event, gathering USMC standards data, and introducing the feature to clients for validation and feedback

Software Engineering Intern

May 2024 – August 2024

- Worked with cross-functional team to improve UI/UX of existing DoW-facing unit visualization web app, enhancing usability and clarity for naval training exercises
- Collaborated with customer representative, implementing 3 DoW-requested UI features in **JavaScript** and **HTML/CSS**
- Developed an interactive radio emission heatmap with pixel-to-color mapping, improving rendering speed by 50%
- Enhanced a 30+ button toolbar using Bootstrap by adding a collapsible modal organization feature, reducing screen clutter and improving user navigation efficiency
- Delivered client requests on-time by collaborating with 20+ engineers in an Agile environment using **GitLab**, supporting timely project completion

PROJECTS

BeachLens | React Native, TypeScript, PostgreSQL, Expo

July 2025 – Present

- Built and launched an **iOS** beach discovery app enabling safer, more informed trips across Florida beaches
- Architected a Supabase backend with row-level security for user auth, Edge Functions to aggregate wave/tide data (NOAA), weather forecasts (Open-Meteo), and beach metadata (Google Places), and storage for user-submitted condition reports
- Integrated Mapbox to render an interactive map with custom beach markers and user-submitted condition reports

PowerPace | Strava API, Java, Spring Boot, React

July 2025 – August 2025

- Developed a full-stack platform for hybrid athletes by integrating **Strava API** data, enabling users to track strength and cardio activities and gain actionable performance insights
- Built an interactive GUI with **React.js** and **TailwindCSS**, visualizing Strava activity data with **Chart.js** to help athletes identify trends and optimize training performance
- Engineered a **Java Spring Boot** backend to fetch and store Strava data in **MongoDB**, ensuring fast, reliable access to athlete activity metrics for real-time analysis

TEMPER | Python/Flask, React, PostgreSQL

May 2025 – August 2025

- Led a team of 5 developers in building a REST API and GUI for a temperature-based risk management system, ensuring reliable real-time monitoring and alerting
- Developed **Python/Flask** endpoints to interface with a **PostgreSQL database**, retrieve sensor readings, and generate custom alerts for threshold violations
- Built a dashboard with **React.js** to visualize real-time and historical sensor data, allowing users to configure and receive alerts dynamically

GatorGoalMate | React, Node, MongoDB

January 2024 – May 2024

- Collaborated with a team of 3 developers to build a full-stack goal-setting social platform featuring content creation, social interaction, profile customization, and account authentication with **React.js** and **Node.js**
- Contributed across 7 Agile sprints, using **Git** for version control and issue tracking to meet feature deadlines
